

I-880 North Safety and Operational Improvements at 23rd and 29th Avenues

Spring 2015

Project Description:

This project proposes to construct operational and safety improvements on I-880 at the existing overcrossings of 23rd and 29th Avenues in the City of Oakland. Improvements include replacement of the freeway overcrossing (OC) structures, safety improvements to the northbound on and off ramps as well as the freeway mainline. The project includes construction of a new soundwall in the northbound direction between 29th and 23rd Avenues.

Project Status: (March 2015)

Project was awarded by Caltrans in April 2014. The \$62 million construction project is funded by the Trade Corridor Improvement Fund (TCIF) under the Proposition 1B approved by voters in 2006. Construction activities began in July 2014, and will continue through 2018. To date, construction is 18% complete.

Project Sponsor: Alameda County Transportation Commission

Construction Update

The project involves several major construction stages. Stage 1 focuses on the construction of the new temporary onramp from 29th Ave. onto Northbound 880 and a new soundwall along the Northbound I-880 direction between 29th Ave. Onramp and 23rd Offramp. This stage is scheduled to complete by June 2015.

Stage 2 involves the long-term closure of the 29th Avenue OC and rebuilding the new bridge. This stage started on April 3rd, 2015, and will last approximately 18 months. The closure will allow crews to demolish the existing overcrossing and rebuild a new overcrossing in the same location. Traffic has been detoured to the E.12th and 22nd Avenue and using 23rd Ave interchange for the duration of the closure.

Public Outreach

Pre-construction public outreach meetings were held in March and April 2014, in the Cities of Oakland and Alameda. In addition to the implementation of the project's Traffic Management Plan, public notifications include flyers and information through project web site. In March, 2015, public outreaches for the demolition of 29th Ave OC were held in the Cities of Oakland and Alameda.
